

FOSS CHALLENGE

Join us the 7. – 9. November 2014 at DTU Skylab

Do you want to make a difference for the global food market, right now and for the future? Join the **FOSS Challenge** and be part of solving global food challenges together with FOSS on areas like food nutrition, adulteration or contamination of food, fast and precise identification of bacteria, and minimize food waste in the production. Everyone from DTU, KU Science and FOSS is welcome to join.

The competition

During the FOSS Challenge weekend, you will form cross-functional teams consisting of students from KU and DTU as well as FOSS employees and compete with and against some of the most experienced innovators in the industry. The best solution will be announced Sunday evening by a panel consisting of Peter Foss Chairman at FOSS, Niels Degn VP Product Innovation at FOSS and other prominent representatives of the Industry and DTU.

Practicalities

The competition will take place at the DTU Skylab where each team can build prototypes and Proof of Principles using 3D printers, pre/prototype kits, different laboratories and much more. Before the innovation weekend, you can learn about the challenges on fosschallenge.com.

FOSS will pay for materials used in preparation for the FOSS Challenge in the period between 10 October to 7 November. The only limitation is that participants are signed up for the competition before hand.

A person dressed as a pilot, wearing a brown flight suit, goggles, and a leather jacket, stands on a paved road. They are carrying a large, dark, wing-like object over their shoulder. The background is a blurred landscape with trees and a clear sky.
