

DTU Patent course 42799

CampusNet introduction

Monday, January 2, 2017

Starting Monday 17 January 2017 at 10:00 in building 450 room 105

Target Groups

To DTU PhD fellows primarily

- Also hello to PhD students from affiliated universities as well as industrial PhDs
- Also hello to scholars and TT officers from DTU and affiliated universities
- Also hello to external peers with a specific interest in university tech trans.

Course calendar

The course runs in week 3, 2016 from Monday 17 January to Friday 20 January, both days included.

Course objectives

1. To give future researchers insight and training in technology transfer, in order to enable them to work efficiently together with tech-trans specialists for the commercial and industrial implementation of research-based knowledge and inventions.
2. To develop insight in industrial business systems that will allow a researcher to work in an industrial R&D context.

Course specifications

1 week, 3 ECTS concentrated course on commercialization of technology and research based inventions, including intellectual property rights, patent law, licensing principles, rules & agreements in university-industry collaboration, intra- and entrepreneurship, business formation, cases and more...
