CONNECT Denmark Sparring

- Individual tailored program
- Customized to development stage and challenges
- One or more elements in sparring
- Financial Forums and pitchtraining
- Follow-up, evaluation, next step

CONNECT Denmark is the Springboard to growth

The case: watAgame

March 2003:

- Springboard #94
- by then mobile multiplayer games now goSupermodel
- by then 4 people now 35
- by then own funding, later business angels, Seed Capital, Vækstfonden, Accel Partners

- August 2009 Tech Tour Denmark | Southern Sweden

- April 2010 Member of CONNECT Denmark

"The test of our business idea gave us the courage to start-up the company"
Henrik Riis, CEO & Founder, watAgame

Raising capital – what financial crisis?

- Who gets invested in?
 - Rapid & sustainable growth
 - Significant size & scale
 - Disproportionately profitable
- Business stage dependant
 - A going concern focused on growth/expansion
 - Early revenue
 - Launched but little revenue
 - Plan, but not launched
 - Glimmer in the eye
- Start-up sources of funding – simple version
 - FFF
 - Grants
 - Customer projects

However:

- Valuations are down (50%)
- Cash per investment is down
- New investments are down
 - Concentration on portfolio (time to exit up)
 - Angels have lack of liquidity
- Revenue generating companies competing with start ups for funding
- New, inexperienced investors looking for deals
- Some consideration to income generating investments, not just capital gain driven exits

Characteristics of Investable Businesses

- Moderate cash needs (DKK1.5M - Business Angel target)
- Don't depend on 2nd round funding
- Don't depend on VC funding
- Revenue generation (soon)
- Must be market driven
- Need to stand out – great presentation
- Need to be able to do twice as much with half the cash

Financing Risk - up

But

- People Risk – down – better for less
- Competition Risk – down – can't react
- General Costs – down – office, space, hardware etc
- Manufacturing Costs – down – free capacity
- Sales Risks – down! – for compelling, pain relieving, productivity/cost cutting solutions

Execution Risk – down?!

I my experience...

- Entrepreneurship is a state of mind – play your strength: Innovator vs. Entrepreneur, outsource/team-up non-core
- Consider shortcuts - more than one way to get into business:
 - Founding
 - Join
 - Heritage
 - Take-over
- Engage customers early – commercialisation is key – could be source of funding
- Crossing Death Valley – cash (flow) is king – when in trouble, double or draw line in the sand?
- Network – ask for feedback then prioritize, rationalize and focus (CONNECT)

Raising capital is not the objective...

- ...it's the means to make the ambition come true!
- Entrepreneur to Present:
 - The Value proposition (and Pain Killer)
 - The Business model (show the money and how to pick it up)
 - The Team (and Board)
 - The Plan (ambition and first steps)
 - The Capital need (and what you put in)
- But first, please conduct a 30 minutes self test:
 - Use 10 minutes, two-three keywords searching for information and competitors on the internet
 - Use 20 minutes on two-three scenarios changing time, capital, resources, roadmap, markets

Wrap-up

- Q&A

Slutber den gode ide >>> videre

Thank you
